

Authorized Service Provider

UPS has partnered with Package Express Centers, Inc. (PEC), a third party vendor; to locate, sign on and manage new UPS Authorized Service Providers (ASPs).

Authorized Service Providers (unlike Authorized Shipping Outlets (ASOs)) are UPS® retail shipping locations (i.e. hardware, pharmacy, storage, grocery stores, etc.) that designate an area in their store to ship UPS for the general public.

The customer must meet and agree to the following basic requirements:

- Non pack and ship business
- UPS exclusivity (one carrier agreement)
- Located in an underserved area as determined by UPS and PEC

The #1 in-store retailing network of small package shippers in the US - serving independent retailers since 1984

If there are any customers in your territory that meet the above requirements and are interested in shipping with UPS, **please call Package Express Centers at (800) 274-4732 or email (pecsales@packageexpresscenters.com).** A PEC representative will contact the customer to discuss shipping with UPS.

Note: The customer will need to meet UPS's qualifying criteria in order to begin shipping as an Authorized Service Provider. PEC will train and provide the customer with UPS Ready® Certified software as well as assist with ongoing customer and technical support concerns.

Program Requirements

- Non pack and ship business
- UPS exclusivity (one carrier)
- Located in an underserved area

Program Benefits

- Authorization to ship and accept drop-off packages from the public
